Applicant(s)

CAERS ET AL.

Examiner

Sikarl A. Witherspoon

Art Unit

1621

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 June 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-18 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-18 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 01 September 2006 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 9 and 10 provide for the use of a propylene-containing stream in a hydroformylation reaction, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claims 9 and 10 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vora et al (US 5,714,662) and Bahrmann et al (US 5,808,168) in combination.

The instant claims are drawn to a process for making a hydroformylation product by contacting an oxygenate with a molecular sieve catalyst to form an olefin composition, separating a propylene stream therefrom, and contacting the propylene stream with a rhodium catalyst to form a hydroformylation product.

Vora et al teach a method for producing an olefin composition containing ethylene, propylene, among other light olefins, by contacting an oxygenate, specifically methanol, with a molecular sieve catalyst (abstract; col. 15, line 15 to col. 17).

The major difference between Vora et al and the instant claims is that Vora et al do not expressly teach hydroformylation of the light olefin(s) produced in the oxygenate conversion process taught therein. However, Bahrmann et al teach the hydroformylation of an olefinically unsaturated compound, such as propylene, using a rhodium-containing catalyst, to produce the corresponding aldehyde(s) (col. 5, lines 15-55).

The instant claims are therefore rendered obvious in view of the combined reference teachings, because Vora et al teaches the production of the olefinic starting material by an oxygenate conversion, and it would have been obvious to employ the hydroformylation process taught by Bahrmann et al to convert the light olefin(s) made

by Vora et al to the corresponding n-aldehyde and/or i-aldehyde, which well established utility.

Claims 11-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vora et al.

The instant claims are drawn to a composition comprising propylene, ethylene, and dimethyl ether.

Vora et al teach such a composition being made via an oxygenate conversion process (abstract; table 3).

The difference between Vora et al and the instant claims is that Vora et al do not teach the exact concentration of compounds that make up the composition in the instant claims. However, the instant claims are rendered obvious since a person having ordinary skill in the art would have been able to modify the concentration of the components by way of the distillations taught by Vora et al in order to arrive at a composition having a concentration of individual components desirable based on the intended use of said composition.

Claim Objections

Claims 5, 7, 8, 14, and 16-18 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to another claim in the alternative only and should not depend from another multiple dependent claim. See MPEP § 608.01(n).
